The hoist is 50 horsepower and the compressor capable of furnishing air for four drills. The shaft is down 150 feet and will be sent to the 200 mark where a cross cut will be sent out both ways, making the direction southwest and northeast. Ed. Bevis has been placed in charge and those who knew him through the Rhyolite and Goldfield boom know he is a man who is thoroughly competent for an undertaking of this character.

Louis Swift, before the senate agricultural committee, opposed the Kendrick bill to regulate the industry, and said he would put regulations in the hands of the secretary of agriculture without limitation or direction. Swift said the packers tried to keep all markets on a level with Chicago prices which were determined by other markets as well. Asked how the markets were brought down if high, he said: "We do what we can to bring it in line, if low," he said, "we all pitch in to buy and prices rise."

Russ Reds Tell Allies Must Withdraw Troops

(By Associated Press)
PARIS, Jan. 28.—Further light on the Bolshevik attitude toward the invitation of the allied and associated powers for a conference with the Russian factions at the Princess Islands is given by an article in the Bolshevik official newspaper of January 28. A Journal correspondent at Berne telegraphs a quotation much more moderate in tone than was the recent note sent by the Russian foreign minister to the Bolshevik emissary at Stockholm. The article also stresses on the indirect character of the invitation, noting that it bore neither address nor signature. The writer declares the allies must choose either between the role of adversaries of new Russia and that of arbitrators. If they desire to prove their fitness as arbitrators they must completely evacuate Russia, the paper says. Then their initiative may be taken seriously, the writer adds.

The committee voted to report the bill continuing wire control to the end of the year.
